

*Reimagining motion for a greener, safer, better world of mobility.*

## AVL in Croatia

AVL-AST d.o.o. ("AVL in Croatia") was founded in 1996 with headquarters in Zagreb as a member of AVL List GmbH, one of the world's leading mobility technology companies for development, simulation and testing in the automotive industry, and in other sectors.

AVL in Croatia as a strategic partner creates and implements software solutions for simulation, testing and optimization of all types of propulsion systems (hybrid, combustion engine, transmission, electric drive, batteries, fuel cells and control technology) for passenger and commercial vehicles, and increasingly turns to software production and electrification. We are a significant partner to a large number of car manufacturers worldwide who, due to stringent environmental standards and fuel consumption reduction, need to continuously improve their products.

### **Our Areas of Expertise:**

- Big Data
- Virtual Testing
- Software Development
- Simulation Technologies
- Autonomous Driving
- Power Electronics

### **OPEN POSITIONS:**

[Model Based Calibration Engineer](#)

[Hardware-in-the-Loop, Software-in-the-Loop Methodology Engineer](#)

[Test Automation Engineer](#)

[Team Lead Big Data](#)

[Team Lead DevOps](#)

### **ALL OPEN POSITIONS**

*If you are eager to work in international environment, you appreciate a relaxed atmosphere, great compensation packages, and you want to broaden your knowledge while thriving on challenges, APPLY for a position in AVL!*
