

CV – Serge Nyallang Nyamsi

Dr Serge Nyallang Nyamsi completed his Ph.D. degree in power engineering and engineering thermophysics from the school of Energy and Power Engineering, Xian Jiaotong University, China in 2013. He is currently a research fellow at the institute of hydrogen technology from Helmholtz-Zentrum Hereon, Germany. His research interests in energy storage technologies include design and optimization of potential metal hydrides for hydrogen storage and thermal energy storage, heat management, and energy efficiency improvement. He also has an interest in efficient conversion of renewable energy resources.
