

Infobip Emerging Talents Program

Dear students,

With pleasure, we would like to announce the new **Infobip Emerging Talents program for 2027**. This is a great opportunity for you to take your first steps in developing your career. Throughout the program, you can gain theoretical and practical knowledge, and mentors will accompany and support you, making the entire learning and progress journey smoother and more enjoyable. An additional opportunity for all of you is the possibility to become Infobip employees after completing the program, thus becoming part of a global IT company.

Who is Infobip?

Infobip is a leading global IT and telecommunications company providing mobile cloud communications services for business customers and enabling them to deliver messages across any channel, any device, anytime and anywhere in the world.

If you are a final year undergraduate/graduate student in the field of business and/or IT and you are looking to gain practical experience in a real global IT company, then this is a great opportunity for you. Join our program and start your career at Infobip!

What's in it for you?

- After completing the program, interns are **offered the opportunity to stay in Infobip** as employees, if they show progress through the program.
- Our program is **paid.**
- Continuous **learning and progress** with the support and help of mentors.

- Cutting-edge technology & processes.
- **More Infobip perks** if you join us – IT equipment, welcome goodie bag, structured onboarding, a team taking care of all the equipment/support you need, company team buildings and other organized activities, the company library, access to the world leading MOOC (Massive Open Online Course) platform Udemy as well as multitude of both internal and external learning materials, organized sports, free lunch at our campuses and offices and many more!

About program:

The program starts on February 8th and lasts for 6 months. Positions are available in multiple locations, including Zagreb, Vodnjan, Rijeka, Split, Osijek and Sarajevo. Currently, we are looking for students for the following positions:

- Software Engineering Intern
